

Assessments

A pre-adoption assessment is of huge value to identify an accurate initial agile maturity baseline with areas that require corrective actions. Inputs to the assessment is via the DVT Enterprise Assessment Tool which was built using the goals and principles from DAD, SAFe, Lean and Kanban; and for cultural assessment – the Schneider Model.

The assessment tool is populated by employees across all layers of a company to give a 360° view of the landscape. The assessment tool can be redeployed at regular intervals to assess progress over time vs initial baseline.

Coaching

On-site coaching and support is the key to a successful Agile implementation. The benefits of on-site coaching is:

- Establish teams, iterations, framework sessions
- Monitoring the Agile adoption progress
- Bring fresh perspectives to your teams and fill knowledge gaps
- Provide advice to the team
- Provide opportunities for people to learn, even through mistakes
- Help teams to solve problems
- Negotiate conflicts within the team
- Promote self-organization and self-discipline within the team
- Motivate teams to deliver on their commitments

Public Workshops

Join our public workshops about a wide range of Agile topics:

- Intro to SAFe
- Agile Estimation
- Scrum in a nutshell
- Release Planning
- Principles of LEAN

Suite of Training Courses

- Agile Deep Dive: ICAgile Certified Professional (ICP)
- Leading SAFe: SA (SAFe Agilist Certified)
- PMI-ACP®
- ICAgile Certified Professional in Business Value Analysis (ICP-BVA)
- ICAgile Certified Professional in Agile Testing (ICP-TST)
